Applications

- Fluid Power
  Pneumatic- or Hydraulic Cylinder
- Manufacturing Engineering
- Mobile Machinery

High precision transducer with touchless magnetostrictive technology for mechanically decoupled and therefore wear-free position measurement for lengths up to 4250 mm.
The integrable and pressure-resistant rod design with passive ring position markers allow the use inside of hydraulic cylinders. Here, the pressure area is sealed by an O-ring on the flange.

Depending on the interface, up to three positions and speed can be measured.
